Understanding Bone Fractures - WebMD A fracture is the medical term for a broken bone. Fractures are common; the average person has two during a lifetime. They occur when the physical force exerted on the bone is stronger than the. Fractures (Broken Bones) - OrthoInfo - AAOS Fractures take several weeks to several months to heal, depending on the extent of the injury and how well you follow your doctor's advice. Pain usually stops long before the fracture is solid enough to handle the stresses of normal activity. Fractures of the Thoracic and Lumbar Spine - OrthoInfo - AAOS Doctors classify fractures of the thoracic and lumbar spine based upon the specific pattern of the fracture and whether there is a spinal cord injury. Classifying the fracture pattern will help your doctor determine the proper treatment.

Fractures: Types, causes, symptoms, and treatment A fracture caused by a disease or condition is known as a pathological fracture. We examine the facts about fractures in this article. A fracture is when the continuity of a bone is broken. Fractures of the Fifth Metatarsal - Foot Health Facts Avulsion fracture. In an avulsion fracture, a small piece of bone is pulled off the main portion of the bone by a tendon or ligament. This type of fracture is the result of an injury in which the ankle rolls. Avulsion fractures are often overlooked when they occur with an ankle sprain. Jones fracture. Fracture | MedlinePlus A fracture is a break, usually in a bone. If the broken bone punctures the skin, it is called an open or compound fracture. Fractures commonly happen because of car accidents, falls , or sports injuries.

Bone fracture - Wikipedia A bone fracture may be the result of high force impact or stress, or a minimal trauma injury as a result of certain medical conditions that weaken the bones, such as osteoporosis, osteopenia, bone cancer, or osteogenesis imperfecta, where the fracture is then properly termed a pathologic fracture. Lumbar Compression Fractures | University of Maryland ... Compression fractures of the spine usually occur at the bottom part of the thoracic spine (T11 and T12) and the first vertebra of the lumbar spine (L1). Compression fractures of the spine generally occur from too much pressure on the vertebral body. This usually results from a combination of bending forward and downward pressure on the spine. When Back Pain Is a Spine Compression Fracture A spinal fracture due to osteoporosis (weak bones) is commonly referred to as a compression fracture, but can also be called a vertebral fracture, osteoporotic fracture, or wedge fracture.
